40,000 ATTENDEES
1,500 EXHIBITORS
550,000 SQ. FT.

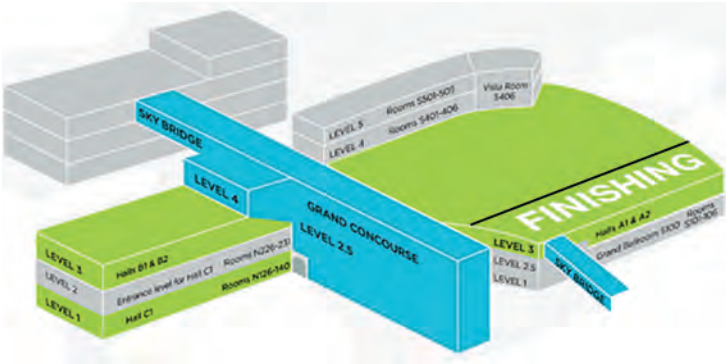
09 - 12 November '15 • South hall • Booth #S5348 • FINISHING & Coating

CALDAN at FABTECH, Chicago

FabTech 2013 was a company first and a great success for CALDAN. Now we are back in Chicago with a bigger booth and even more conveyor systems at display. You will see a live presentation of our renowned P&F100 – Power & Free floor conveyor, and also the Single Line conveyors HD140 and HD100S. The 140 systems are characterized by their excellent stability in operation, and their ability to handle large, heavy and unbalance jigs, whereas the HD100S features vertical conveyance of workpieces in rise and fall sections.

Furthermore a selection of our overhead conveyor range will also be present at the booth. As FabTech is North America's largest exhibition within our industry, we have put together a strong, international sales team to welcome you at our booth:

- Mr. Colin Berry, Sales Manager for US & UK
- Mr. Stuart Marlee, Sales Manager for US & Asia
- Mr. Frank Berg, Sales Manager for South America & Europe



We look forward to seeing you at:
