CALDAN @ PAINTEXPO EURASIA

From 4th to 6th October, CALDAN will be exhibiting at Paint-Expo Eurasia at the Istanbul Expo Centre in Türkiye. This Eurasian event is organized under the umbrella of PaintExpo, the world's leading trade show for industrial coating technologies. In 2021, the show featured 47 national and international exhibitors at the forefront of industrial coating applications.

Attended by more than 4,000 visitors from 13 different countries, the events once again took the pulse of the industry and the region. This will be the second time CALDAN exhibits innovations in overhead and floor conveyors at PaintExpo Eurasia, and our expectations are once again very high.

Our team of international conveyor specialists will be ready for you in Istanbul. We are looking forward to your visit!

NEW PROJECTS & INSTALLATIONS IN TÜRKIYE:

For a number of years CALDAN has been active in the Turkish market, and we now have 20+ overhead and floor conveyor systems installed and running here. In Türkiye we work together

with both world renowned, international system integrators, and a network of local partners. Below you will find a selection of new CALDAN projects and installations in Türkiye .
