

SERVICE ENGINEER - National & International Projects

Are you interested in the maintenance and servicing of mechanical components and do you have experience as a mechanical service engineer or experience from a similar industry?

As Service engineer you will be part of our Service & After Sales team and together with 15 dedicated colleagues in Denmark, UK, Germany & India you will have the task of rebuilding, servicing and maintaining our systems at our international customers in the UK and abroad.

Your tasks will be:

- preventive maintenance of conveyor systems
- repair of conveyor systems
- preparation of service reports
- rebuilding conveyor systems
- training of customer maintenance personnel

The position is full-time and 125-150 travel days per year are to be expected.

We expect you to:

- have qualifications as mechanical fitter, mechanic or similar trade
- be quality conscious and structured
- thrive on working independently and be able to prioritise your time
- be service-minded and flexible
- speak English, additional languages are an advantage

We offer:

A varied and challenging job in an international company working with some of the world's largest industrial companies.

When you are not out on service assignments at home or abroad, your permanent base will be our office in Redcar, North Yorkshire. Here, there is a culture of helpfulness overall in the organization.

A service van, mobile phone and PC will be provided.

Your salary will be determined individually according to your qualifications. The company offers a pension scheme, health insurance and profit sharing.

The position reports to the company's Service & After Sales Manager, Mr. Michael Hald.

Send your application and CV to michael.hald@caldan.dk.

We have no application deadline and applications are processed on a continuous basis.
