

CONVEYOR CLEANING SYSTEMS

The CALDAN cleaning system CCI000 is designed for both our overhead and our floor conveyors.

System advantages:

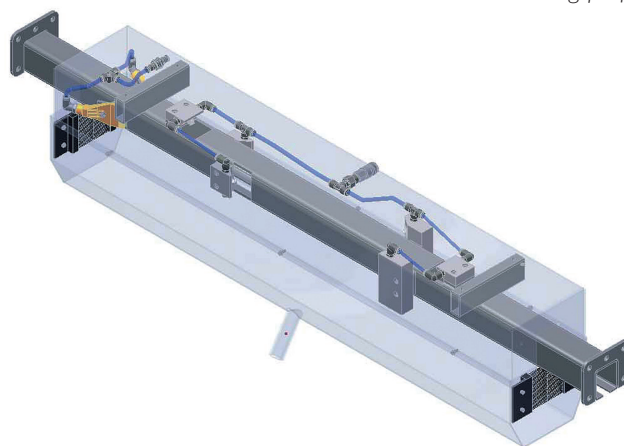

- Cleans the chain directly in the profiles. No need to disassemble the conveyor system for chain cleaning
- Extends the lifetime of the chain.
- Reduces wear & tear and oil consumption
- Reduces contamination of the plant
- Reduces contamination of the work pieces
- Mobile – one cleaning unit can be used for several conveyor systems

System features:

- The CCI000 consists of mobile and built-in cleaning units
- The built-in cleaning profile can operate in both production- and cleaning mode
- The mobile cleaning unit can be employed depending on location

The systems can also be hired for chain cleaning- on customer request connected and operated by our service engineers. For production plants with several conveyor systems in operation, it will be advantageous to purchase a mobile cleaning unit

CCI000 - built-in cleaning profile
