## GROUND LEVEL LUBRICATOR

Efficient, safe, and hassle-free chain lubrication. Introducing the Ground Level Lubricator, the latest innovation in conveyor system maintenance.

Designed for effortless lubrication of cardan chains, this powerful unit allows operators to apply lubricating oil from floor level, eliminating the need for ladders, scaffolding, or lifting equipment.

With an impressive pumping capability, the Ground Level Lubricator efficiently delivers oil to conveyor systems mounted up to 6 metres above the floor, ensuring optimal lubrication and extended chain life with minimal effort.

### Key Benefits:

- Safe & Ergonomic - no need to climb; reduces workplace risks.
- Time-Saving - quick and easy lubrication keeps downtime to a minimum.
- High-Performance Pumping - effectively delivers oil to elevated systems.
- Optimized Chain Maintenance - enhances conveyor reliability and longevity.

Upgrade your maintenance routine with the Ground Level Lubricator - because efficiency starts from the ground up!
