

## 1. Company details:

Caldan Conveyor A/S – *Part of Axel Johnson International AB.*  
Roeddikvej 91, DK-8464 Galten, Denmark (HQ)

Number of employees: Approximately 165, Worldwide,  
Caldan DK / Caldán SE / Caldán DE / Caldán UK / Caldán China /  
Caldán India / Caldán France / Caldán USA.

CALDAN Conveyor A/S is a worldwide leading, Danish supplier of overhead conveyor and floor conveyor systems. We are a well-established, modern technology company with 60 years of industry experience. We design, manufacture & install internal transport systems for automated surface treatment lines & materials handling.

Since our foundation in 1963, our head office has been located in the Aarhus area of East Jutland. We have subsidiaries in Germany, England, USA, France, China and India. Additionally, through strategic alliances, we have CALDAN managed sales & support functions in Türkiye, South America and South Africa.

CALDAN is also part of **Industrial Automation**,  
a business group within Axel Johnson International.

### Mission & Vision:

Our mission is to provide the best conveyor solutions and services to our customers worldwide through our passionate, knowledgeable and united international team. We do this by means of our commitment to finding innovative solutions to our customers' needs based on our leading technology, standardised products, and dedication to delivering on our promises. We do this because we care. We care about our customers, our colleagues, the environment and CALDAN.

Our vision is to be the global partner of choice for intelligent, quality conveyor solutions and service. This means being the preferred partner for our customers, our employees and our suppliers, as well being a leading environmentally responsible manufacturer.

### 3. Production:

Modern production facilities counting 8.400 m<sup>2</sup> ensure an efficient manufacturing of innovative quality products. Employing the latest design and manufacturing techniques we ensure that all our conveyor systems meet the highest quality standards possible also ensuring that we meet and wherever possible exceed any legislative requirements with respect to safety standards etc.

Our production facilities include a dedicated area for testing and demonstration purposes. This has the following advantages for our customers:

- running tests on systems and system innovations round-the-clock
- possible hands-on system experience for the customer
- system testing with customer specific jigs and loads
- functionality and stability testing
