## **CALDAN appoints new Chief Operating Officer**

CALDAN Conveyor A/S is proud to announce the appointment of Steen Svenningsen as our new Chief Operating Officer. Steen officially assumed his role on April 16, 2026, and he will be a central figure in supporting our continued operational excellence and global growth.

### **A strong background in operations and Lean management**

Steen brings a wealth of knowledge to CALDAN, having spent the majority of his career specializing in production and supply chain management. His professional background includes a decade of leadership at EC Power, along with valuable experience from Danfoss.

Throughout his career, Steen has successfully managed a wide array of complex operational tasks. His expertise ranges from building supply chain functions from the ground up and executing production relocations to driving continuous improvement through Lean methodologies.

At CALDAN, his primary focus will be on creating structured progress and ensuring that our daily operations remain as efficient and stable as the conveyor systems we produce.

### **Leadership built on collaboration**

Steen's leadership approach perfectly balances a focus on business efficiency with a strong commitment to people.

"Steen brings solid experience in operations, leadership, and organizational development," says Claus Nørgaard, CEO at CALDAN. "Throughout his career, he has worked focused on creating structure and progress in complex businesses. With his leadership approach and strong focus on both people and business, I am confident that he will be a valuable asset to CALDAN."

Originally from Hvide Sande, Steen brings a grounded West Jutland mindset to his professional endeavours. He values an informal work environment characterized by open dialogue and strong teamwork.

"I thrive best in an informal environment with open and direct dialogue, a strong focus on collaboration, and a good sense of humour in everyday work," Steen explains. "Already during the interview process, I got a very positive impression of the company and the products, which has only increased my motivation to become part of the organization."

**Beyond the office**

Outside of his professional life, Steen lives in Stevnstrup with his two children. He is highly active in his local community and spends much of his free time as a dedicated coach for his son's youth football team. This commitment to coaching naturally reflects his broader passion for leadership, teamwork, and developing the people around him.
